WORK EXPERIENCE

Senior Software Engineer Oct 2024 - Jun 2026

Recharge | Rewards

- Led a team of developers to build the credit reporting dashboard from 0-1 using **Python, React, MySQL** which helped merchants delivering **3M+ GMV/month** understand customer insights and credits ROI
- Built one-click cancellation tool in **Python** and **React** to bring product to legal compliance, retained merchants delivering **5M+ GMV/month**
- Led tech design reviews and architecture discussions, **owned** cancel prevention and credits systems
- Reduced alerts noise by **80%**, proactively increased code quality in high-touch files with **0 incidents**
- Created post-project documentation standards that reduced context loss, replicated across the engineering org

Software Engineer Nov 2022 - Mar 2024

Sym (Series A startup)

- Overhauled request permissions in **Python, Terraform** to enable and expand granular request access (from 1 to all platforms) for **the entire customer base**
- Managed the **full project lifecycle** for 2 initiatives prompted by client feedback
- Spearheaded Vanta integration using **Celery** in **Python** (bit.ly/vanta-blog-post)
- Elevated team knowledge in **React**, paired with tech lead, led frontend work for self-service feature
- Accelerated deployment speed by **51%** using parallelization on **CircleCI** test jobs

Software Engineer Jul 2021 - Nov 2022

Bolt | Merchant Experience

- Reduced unnecessary calls to a major API endpoint by **85%** and DB CPU usage by **60%** after diagnosing and resolving finicky rate limit errors (bit.ly/the-mystery-caller)
- Redesign of user invitation system in **Go, React, PostgreSQL, GraphQL**
- Built frontend of an upsell feature targeting **\$12B+ GMV** in **React, TypeScript** mentored the backend engineer intern, coordinated progress between stakeholders
- Automated calculating merchant's network overlap metrics using **Go, BigQuery**

PROJECTS

JapaneseTab Mar 2019 - present

1k+ users at its peak, 4.5/5 rating, #3 Product of the Day on ProductHunt with 300+ upvotes

- Built a Chrome extension that helps users learn Japanese in every new tab
- Built with **JavaScript, HTML, CSS, Jisho API** (for translations), **wanakana** (for switching scripts)
- Maintained and added new features after user feedback (i.e. voice, dark mode)

SKILLS

Experienced: Python, React, TypeScript, JavaScript, HTML, CSS, PostgreSQL, bash, git

Intermediate: C, C++, Java

Other: Docker, Agile, MySQL, SQLite3, Terraform, AWS S3/EKS, ElasticSearch, Datadog

EDUCATION

Bachelor of Computer Science - University of Waterloo, 2021
